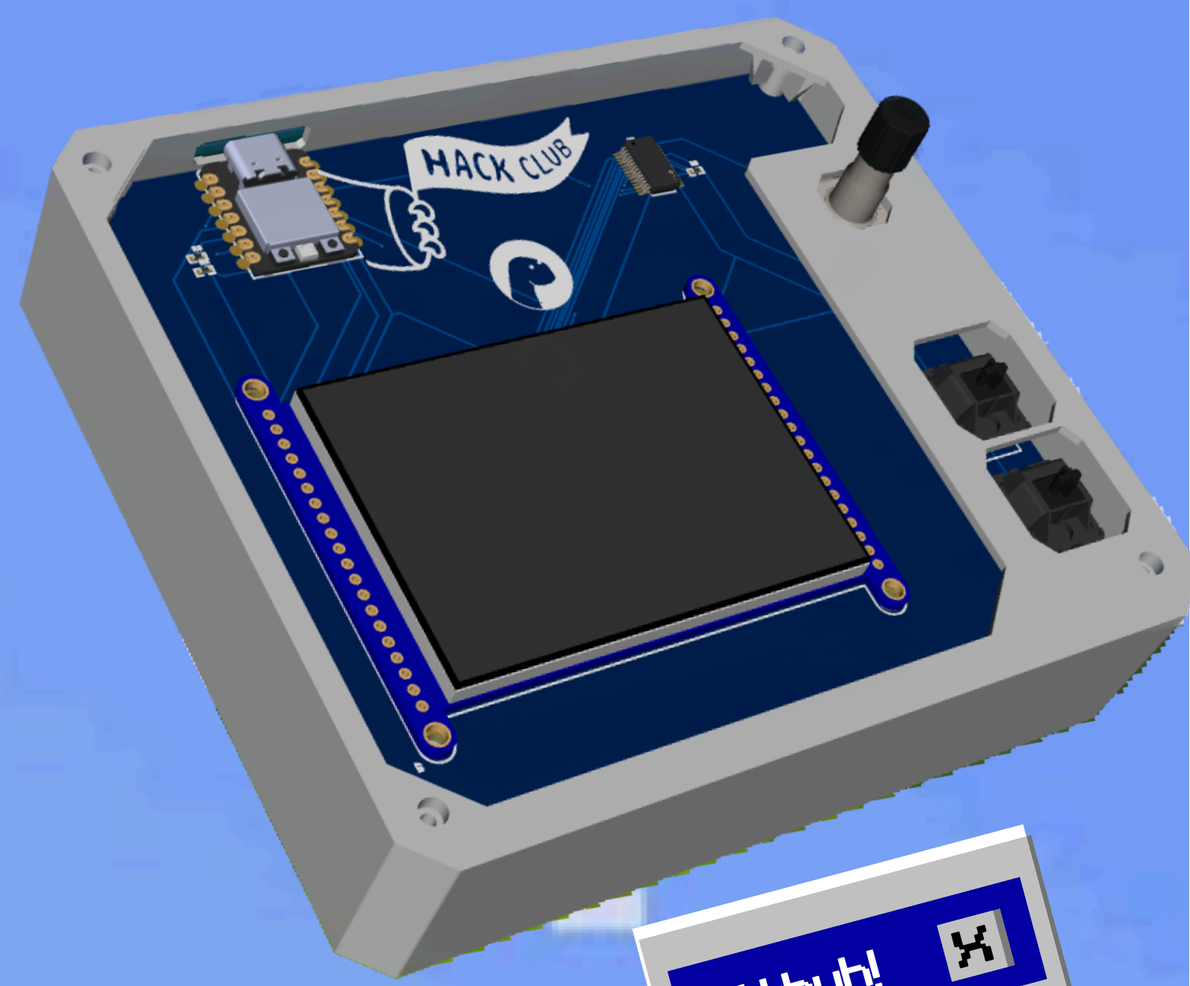
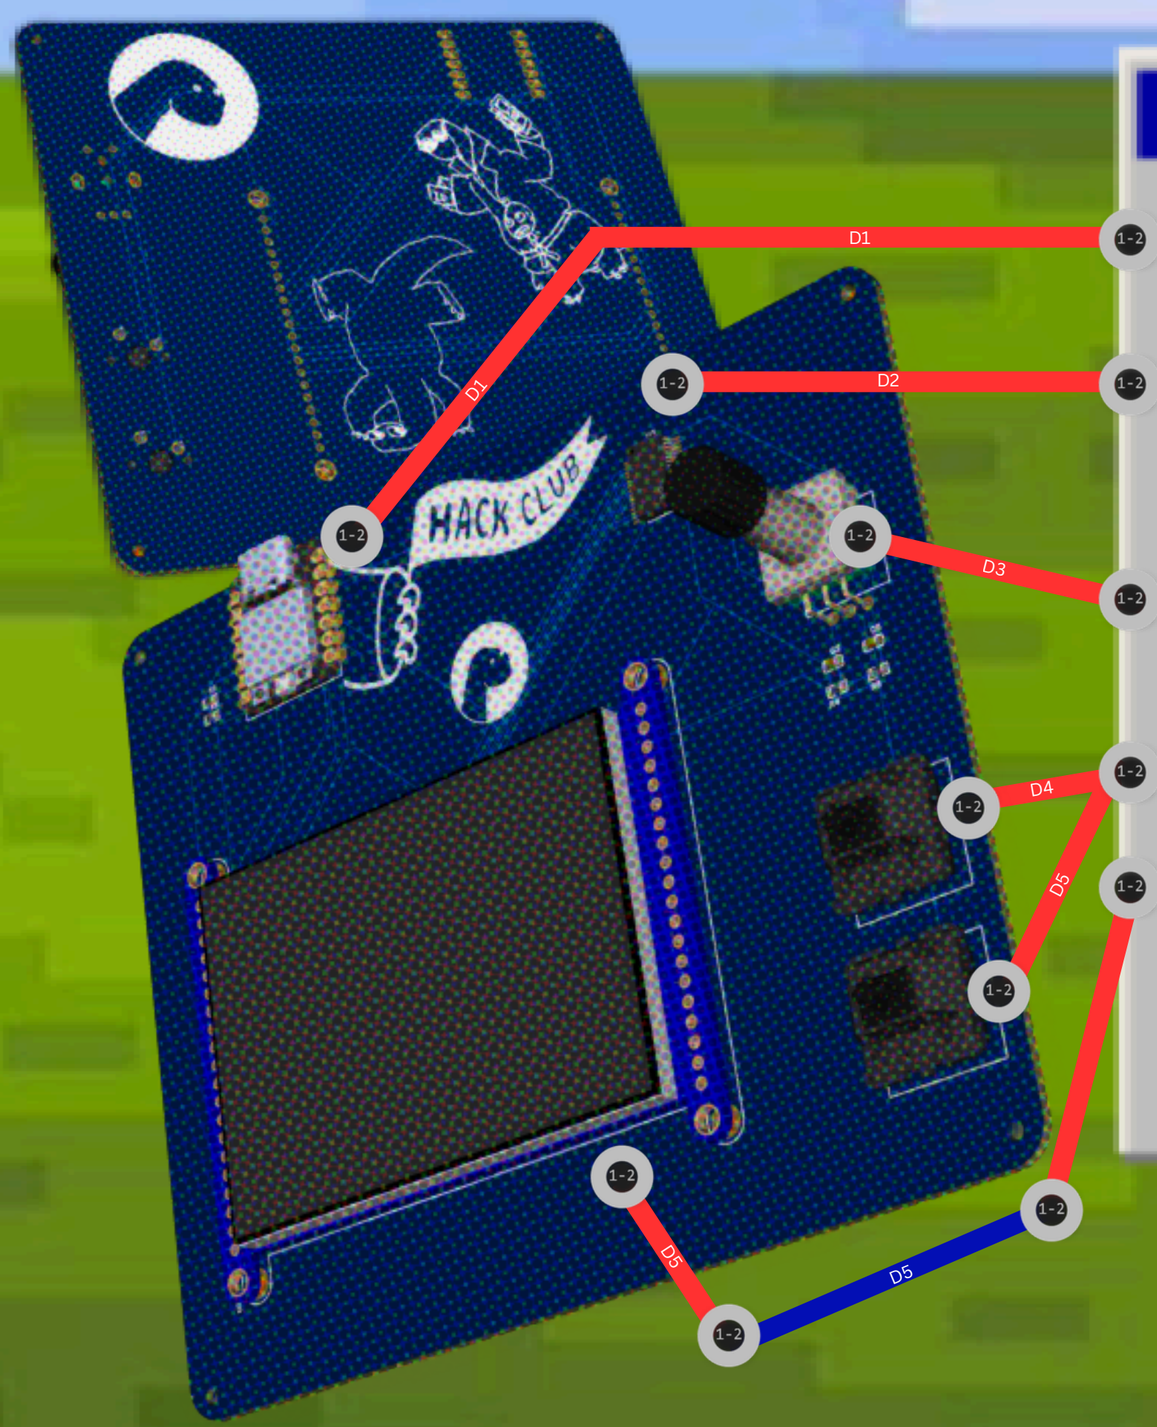
is this the beginning??

quite similar to a StreamDeck, but instead of a grid of buttons that launch apps, it includes a screen that show-cases different screens with different functions.

ok



github!



PARTS!!

- It uses a Seeed Studio XIAO RP2040, Pretty budget friendly microcontroller:
- A MCP23017, FOR THEM EXTRA PINS! (only drawback of the XIAO 2040)
- A Rotary Encoder, for all media control purposes
- Two Cherry MX Switches, for Play/Pause
- Adafruit 1770, A resistive touchscreen module

ok
